

Notice to Mariners No.05 of 2023

Admiralty Chart Nos. 5621.15, 1772 & 2046

To all ship owners, shipmasters, Agents, fishing vessels, pleasure craft users,
seafarers and fishery organisations.

Changes to Navigation Channel Wexford Harbour Entrance

Mariners are advised that significant movements of sand in recent months have changed the navigation channel configuration at the entrance to Wexford Harbour.

Monitoring of these changes are ongoing and to avoid confusion the virtual buoyage at the entrance has been removed. The seasonal buoyage is expected to be reinstated early summer as the situation stabilises.

Mariners are advised to proceed with extreme caution when navigating in this area and to use all available means to ascertain any possible changes in depths and plan passages accordingly.

**Capt Phil Murphy
Senior Marine Officer
Wexford County Council**
